

We hired Select to solve our water seepage problem in the basement.
And found that Select Basement Waterproofing was absolutely incredible!
Not to mention that Select came highly recommended from our 2 neighbors.

Jerome (the Owner) looked at our problem and within minutes realized the problem and the solution. I was pleased with the fact that no high-pressure tactics were used like the other companies that we had in before to get a quote.

Our decision to hire Select Basement Waterproofing was one of the best investments we ever made for our ranch home. From start to finish they were unbelievable!!! They were the best contractor we ever had working for us!!!

The job was done exactly as we were told and no corners were cut, and they did extras and did not charge us!!! My father was so amazed that he even did his house, that not only needed waterproofing, but it had many structural problems. Select Basement Waterproofing excavated the basement one foot deeper to make the basement like you would never believe.

My father's and my basement do not smell anymore at all, are now dry to the bone, clean, and look great. My basement and my dad's basement is on Jerome's video computer.

Now my basement is half finished, with a bedroom, full bathroom, and gym, and office.

Thank you SELECT BASEMENT WATERPROOFING COMPANY.

Now our home is two levels, and is so nice to go down stairs.

Keep up the great work.

Thanks again
